THE KEY TO OUR SUCCESS

Our mission is to help people improve their shooting performance and self confidence, providing them an exceptional experience each and every time. We work hard, every day, driven by a passion for excellence and a desire to be the best ammunition company in the world in terms of performance, service, and quality. Since 1885, we have taken the greatest care with every single detail regarding our products. The result is superior and consistent performance as well as perfect aesthetics. We believe that loading your shotgun with a cartridge that is simply beautiful to behold is truly a pleasure for any hunter or shooter.

B&P PRO TEAM

At Baschieri & Pellagri, performance is more than a promise — it's a tradition. Our Pro Team brings together elite competitive marksmen and women from across the country, each with a record of excellence in clay target and shotgun disciplines. These athletes choose B&P not only for proven performance and precision, but because they trust our shells to deliver consistency, comfort, and confidence when it matters most. From Sporting Clays to Olympic Trap and Helice, our Pro Shooters embody the pursuit of perfection and the spirit of competition.

NICOLAS BERRY

Being born and raised in Europe, history and culture are truly important to me. There are a lot of historic companies in all the industries and B&P is definitely one in the shooting industry. I am extremely proud and honored to be part of their team and to represent this incredible brand on and off the sporting courses.

WHY B&P: Performing at the top level ultimately comes with making crucial choices in terms of equipment. I believe that ammunition manufacturers have come a long way in the last decade and that there is no “bad shell” on the market. However when looking for the best combo consistency / performance / comfort, nothing can beat the B&P shell line. This is one of the reasons I exclusively use B&Ps.

PRODUCT CHOICE: A high performance shell within the B&P range that would also be forgiving, my ammo of choice is the B&P Mach 1oz. 1,300fps #7.5

JOSEPH CHARNIGO

I am honored to represent one of the best manufacturers in the shotgun shooting world! Its exciting to be on team B&P and be able to celebrate the 140th anniversary with them.

WHY B&P: I choose B&P ammo because I demand the highest quality and consistency in a product when competing at the top of the game. I want every advantage I can get to be successful against my competition and I feel B&P helps me stay at the top of my game.

PRODUCT CHOICE: My shell of choice is the Mach 1250 1 1/8oz 8's. A combination of soft recoil and excellent pattern density give me all the advantages I am looking for when competing throughout the season. My confidence in the product helps take my game to the next level!

HAYLYN HANKS

Being part of a 140-year legacy is truly an honor. It's inspiring to represent a company with such a rich history of innovation and excellence in ammunition. It gives me a sense of pride every time I step onto the range, knowing that I'm part of a lineage that has contributed so much to this sport and industry.

WHY B&P: Their unwavering commitment to quality and performance. In my discipline, consistency and reliability are everything, and B&P delivers that time and time again. Their ammunition not only gives me the confidence to perform at my best but also showcases the precision and attention to detail that are crucial in competitive shooting.

PRODUCT CHOICE: B&P Mach 1 oz at 1250 fps, and it's my go-to choice for a reason. This load strikes the perfect balance between speed and recoil, giving me the consistency and precision I need in competition.

KAITLYN KOENIG

Being part of B&P's 140-year legacy is a profound honor. It's inspiring to be a part of a tradition of excellence that has shaped our industry for generations.

WHY B&P: B&P Ammunition stands out in quality, comfort, and performance. B&P's variety of shotshells allows me to choose the shell that is best for my needs. I choose to shoot B&P in both sporting clays and skeet because it gives me the confidence to crush every target.

PRODUCT CHOICE: B&P F2 Mach 1oz 1250 fps or B&P Competition One 1oz 1160 fps
The F2 Mach and Competition One shells offer outstanding performance and quality. The minimal recoil makes them comfortable to shoot, facilitating quick and seamless transitions between shots. B&P Ammunition's consistency and performance provide me with the confidence to excel on the course.

DIANE SORANTINO

I'm proud to be a small part of the legacy of B&P. Being aligned with a brand that values tradition, quality, and performance gives me confidence every time I step onto the range.

WHY B&P: Superior components that produce reliability and confidence. B&P's attention to detail and commitment to consistency allow me to focus entirely on my shooting, knowing my equipment will perform exactly as expected.

PRODUCT CHOICE: Mach 1oz. 1300fps
I have full confidence when pulling the trigger that it will break any target. The speed, energy, and smooth shooting characteristics make it a dependable choice when precision matters most.

GEBBEN MILES

It's an incredible honor to be a part of the 140th legacy! Being associated with a brand that has stood the test of time and continues to set the standard in performance and innovation means a great deal to me.

WHY B&P: Because it's simply the best! From consistency to reliability, B&P has earned its reputation through generations of shooters who demand excellence every time they step onto the range or into the field.

PRODUCT CHOICE: In my opinion the 1 ounce 1250 Mach is the best shell on the market. Its speed, smooth recoil, and dependable performance give me total confidence shot after shot, whether I'm competing or training. It's a load I trust when it matters most.

KAREN MILES

It's an honor to be apart of the 140th anniversary. The longevity and quality of the company and product is unmatched!

WHY B&P: I choose B&P for Sporting Clays and FITASC because of the quality of the product! The Gordon Case insures light recoil while having a solid pattern for all targets.

PRODUCT CHOICE: My favorite shell is the Comp One 1 oz. 1160 7 1/2 shot because I enjoy the light recoil and have total confidence that the lighter speed maintains its pattern better at a further distance.

MACIE PAGE

It is so exciting to work with a company that has been able to provide such quality shells for 140 years. I like that they consistently provide shooters with so many different types of ammunition that is consistent with every shot.

WHY B&P: I need a shell I can consistently count to be able to break the targets. With my B&P shells I know that I will be able to crush the target while still being able to shoot a shell with low recoil. B&P shells give me the confidence when shooting Helice to know the targets are going to separate when I hit them.

PRODUCT CHOICE: I shoot the B&P F2 Mach 1 oz. 1250 fps shell. Before I found this B&P shell, I had to shoot slower ammo because I could not handle the recoil. Once I started shooting B&P shells, I was able to handle a faster fps without causing me problems from the recoil. This shell gives me the confidence that it can break the target without the recoil becoming a problem for me.

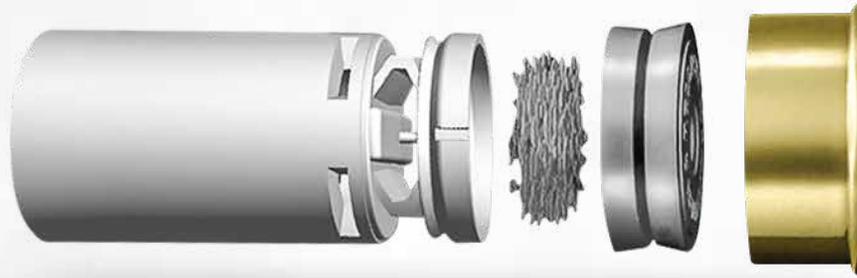

JOSEPH PINCHIN

B&P is a company rooted in history and has a reputation for making quality ammunition for avid shooters. It's an honor to be a small part of that and to represent a brand that has been held in such a high regard for so long.

WHY B&P: I choose B&P because the quality of the product line is extraordinary. They are made only with the best components and perform extremely well on the course while having very little recoil.

PRODUCT CHOICE: The Mach is my product of choice. They are hard-hitting on targets, have very little recoil, and contain the most premium components all allowing for a great shooting experience.

EXPERIENCE SOFT, CONSISTENT, UNPARALLELED PERFORMANCE

THE GORDON CASE

Our Gordon Case, which is unique and exclusive in the market, gives those who use it the ultimate feeling of shooting softness and comfort. The Gordon Case, in synergy with our exclusively designed wads, creates a unique combination ensuring maximum reduction of recoil. In fact, this design is the only one that offers two distinct dampening systems in two distinct sections of the cartridge. The synergistic effect of this dual dampening design results both in a softer feeling shot, minimizes the perceived impact on the shooter's shoulder and reduces the potential of deforming the individual shot pellets resulting in a tighter, more uniform shot pattern.

GREEN CORE

An ongoing project that emphasizes the strong positioning, excellence, innovation and credibility that distinguishes Baschieri & Pellagri since 1885. We are a team that operates and is guided by a responsibility for environmental sustainability. Our intention is a commitment to our customers which will allow them to engage their shooting sport passions with the reliability, superiority, and earth-friendly livability. Preserving the legacy of the next generation is our daily commitment.

COMPONENTS

Green Core is our commitment to a range of components made with 100% biodegradable material. This project, lead by the Baschieri & Pellagri R&D team, was developed in collaboration with academic research institutions to ensure the viability and excellence of our products.

Green Core Wad - Base

Lead and bismuth shot shotshell loading

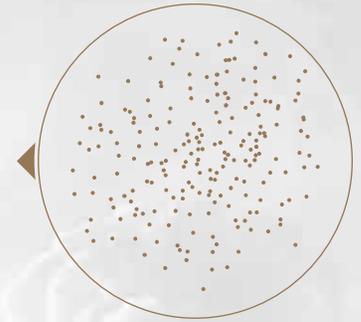

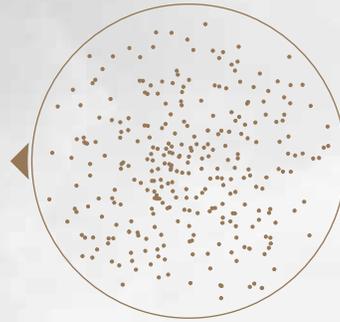

Green Core Wad - Special

Steel, tungsten and other alternative material
shot shotshell loading

Whether you are a land owner who is concerned with soil pollution, the health and safety of livestock, or just a conscientious shooter who wants to 'leave no trace' in the waterways and wilderness, the Green Core wad was envisioned to help mitigate that.

LOADINGS & PERFORMANCE

Thanks to our R&D activities with the Green Core wad, we have developed a range of technical solutions to manufacture wads made with 100% biodegradable materials with technical performance inline with or better than existing traditional plastic wad technology. The Green Core components allow perfect ballistic performance in different climatic conditions, regardless of temperature and humidity.
